To Whom it May Concern,

I wish to use this method to strongly oppose the lack of any type of informative labeling of irradiated food. As someone who must, for health reasons, be cautious about the products included in the foods I consume, I am strongly opposed to any form of food tampering. I consider irradiating food a definite form of tampering!

As a consumer, I believe it is my constitutional right to be informed. I therefore request that MY government listen to me and all others who request labeling of irradiated foods.

Sincerely
Jan B. Gutierrez
